

Description

i9s specialises in industrial safety, so we can advise you on how to prepare the machinery **instruction handbook** or else the **assembly instructions** in the case of partly completed machinery.

Specifications

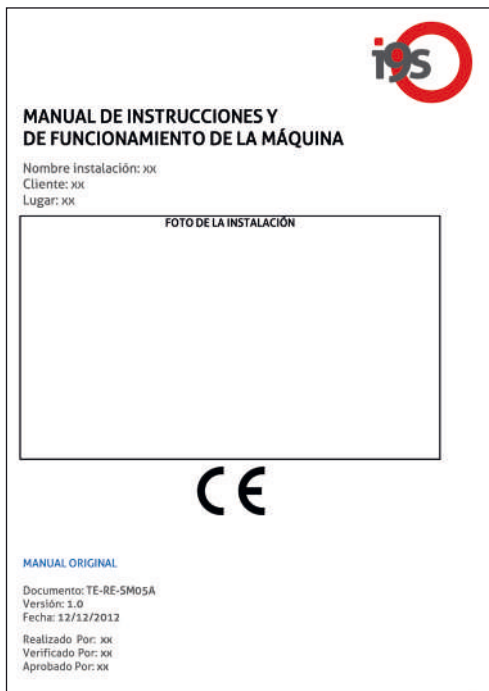

The **instruction handbook** is one of the **mandatory** documents according to Machinery Directive 2006/42/EC (section 1.7.4.2.) and must accompany the machine. The handbook must include all the sections of the Machinery Directive that apply to it.

In addition to the applicable sections of the Machinery Directive, the indications of the sections of the following standards must be taken into account:

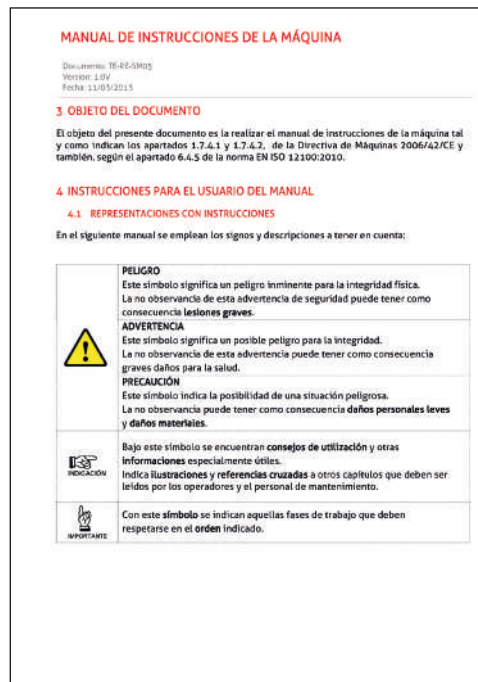

- **EN ISO 12100** Section of the standard: "Accompanying documents (in particular — instruction handbook)".
- **Type-C standards** (specific regulations for type of machine) Section 7 of the standard: "Information".

Examples

Some examples of the instruction handbook are shown below:

Cover of the instruction handbook

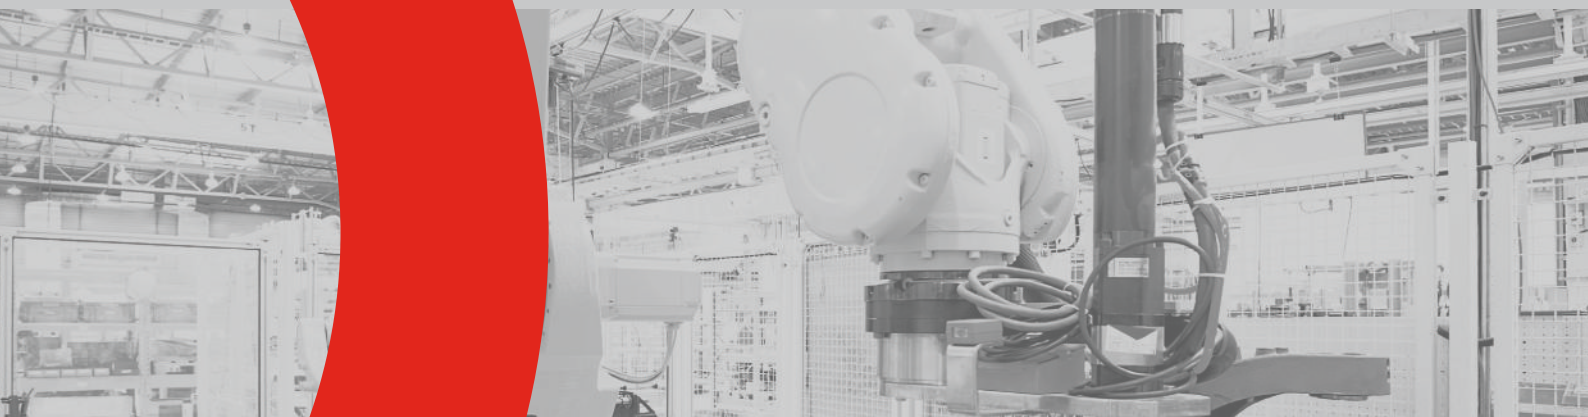

Example of the contents of the instruction handbook

Documentation

The documentation can be delivered:

- In PDF digital format.
- In Spanish. Other languages on demand.
