

Description

Directive 99/92/EC on the minimum provisions to improve the protection of the health and safety of workers exposed to the risks derived from explosive atmospheres is transposed into Spanish legislation through **Royal Decree 681/2003**. This Royal Decree applies to companies that use or handle flammable material or explosive powders.

i9s can help you to carry out the DOPEX or DPCE of your installation by carrying out detailed risk analysis and applying the current European regulations.

Directive 2014/34/EU on the approximation of the member states on protection devices and systems for use in potentially explosive atmospheres, is transposed into Spanish legislation by Royal Decree 144/2016. This Royal Decree applies to companies that supply equipment for use in areas with potentially explosive atmospheres and includes within its scope not only electrical material, but any other for use in potentially explosive atmospheres, as well as protection systems and devices to be used outside the explosive atmosphere but which have an impact on safety..

i9s carries out the technical files that must be carried out according to **Directive 2014/34/EU** for different categories.
